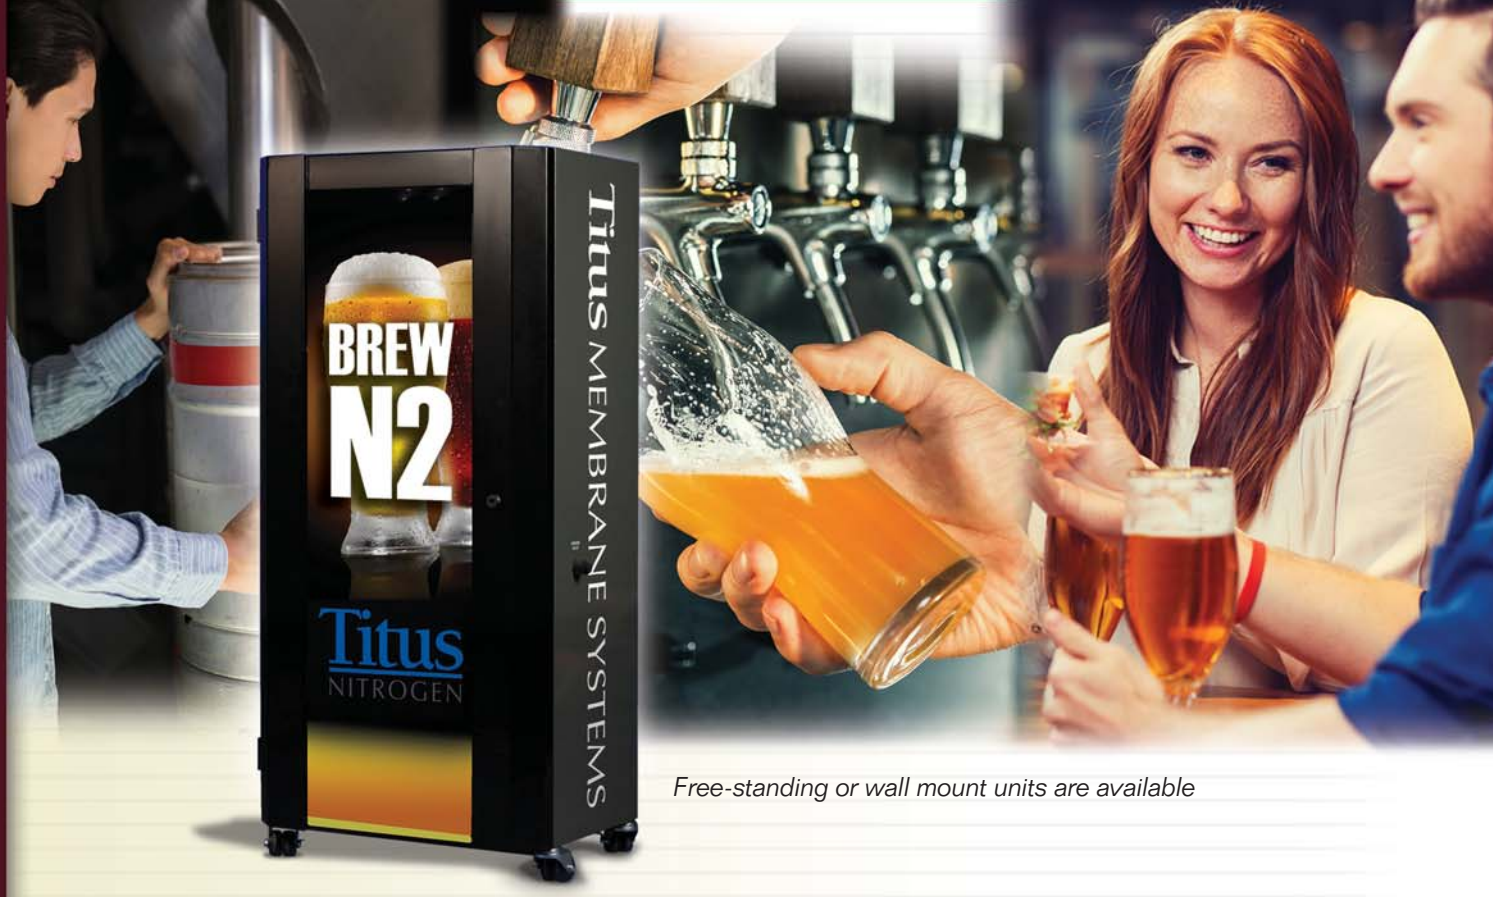
ON-DRAFT BREW N2 SERIES



Free-standing or wall mount units are available

Brew N2 Mixed Gas Dispensing System:

- *Generates beverage grade nitrogen on site*
- *Eliminates over & under carbonation*
- *Provided with or without internal gas blender*
- *Compact technology takes up minimal space (Can be wall mounted or free standing)*
- *Maintains product quality as intended by the brewer*
- *Increases customer satisfaction & loyalty*
- *Great value in nitrogen generation technology*

The Brew N2 is Designed to Meet a Broad Range of Beer Industry Needs

The Brew N2 Mixed Gas Dispensing System raises the bar on nitrogen generation technology for draft beer applications. Engineered for longevity and high output, the new Brew N2 provides the exact blend of CO_2 and nitrogen, which protects the product quality by delivering the beer in the way the brewer intended. This ultimately increases your profitability and customer satisfaction.

Brew N2 blends the correct ratio of nitrogen and CO_2 to push the product from keg to tap, eliminating over-foaming or under-carbonation, and ensuring a consistent, high quality product, brew after brew.

Talk to us about your specific needs. We have solutions available to meet your nitrogen requirements in a cost-effective and efficient manner.
